

Pre-K 2 Newsletter

May 28th – May 31st

We had an awesome week!

This week we talked all about bees!

We learned how bees start out as little eggs that hatch into grubs, and after being fed lots of honey from their friends, they turn into bees.

We also talked about how bees learn to drink the nectar on the flowers and gather the pollen by watching the other bees first.

For crafts, this week, we made bumble bees, bee crowns, and beehives using bubble wrap to paint the hives .

On Thursday with Miss Kayla, we were excited to have Acro outside. Everyone did a great job listening!

Some of the stories we read this week were: Little Bee, The Bee Who Lost Her Buzz, Honey Bees, Behive, and Bee.

Next month we will be reviewing all our colors and shapes.
